

## ARMY BIRDMAN DETAILED FOR STATION HERE

(Continued from page one)

near future. I am informed that the aviator who was here a couple of years ago reported unfavorably on flying conditions, but an army flyer is coming soon, and then we will know more about it. I haven't heard as yet what officer is coming here, or the exact date of arrival.

General Funston said this morning that if Tom Gunn, the Chinese aviator now here, cared to make tests at Schofield Barracks, as he had stated in an interview published recently in the Star-Bulletin, every facility for doing so would be given him.

The aviator who is coming will be attached to field company E of the signal corps, which recently arrived here, and which is now stationed at Shafter, although it is almost certain that flying headquarters will be at Schofield, the terrain being more adaptable for flights.

First Lieutenant V. E. Clark of the 68th company of coast artillery, stationed at Fort Kamehameha, has been ordered to aviation duty, and will leave shortly for the army aviation school at San Diego.

that a flyer will be sent here in the

## CITY HALL IS SHAKEN BY DYNAMITING

After feeling the city hall tremble as if struck by an earthquake, when fear was expressed that the continued explosions would injure the municipal structure, officials today made a protest against the alleged reckless dynamiting which has been going on for some time in clearing the site of the former Bulletin office on King street, which is being done under the direction of a Japanese contractor.

An unusually large charge of dynamite was set off this morning, sending a geyser of dust and dirt and stones into the air and shaking the ground in the neighborhood. It was felt in all buildings within quite a radius of the explosion and especially severe was the shock in the city hall.

Complaints, it is understood, have been made before to the contractor, and he has been cautioned not to use excessive charges of the explosive. Saturday the police confiscated large quantities of powder which he is said to have allowed to remain unguarded on the street, where a match or a lighted cigarette thoughtlessly tossed away would probably have cost the lives of many persons. The powder was later surrendered to him, conditioned that he would be more careful.

## BISHOP ESTATE MAY LOSE LAND WORTH MILLION

(Continued from page one)

Bishop Estate would unquestionably have title under the statute of limitations, but as the supreme court ruled a few days ago the statute of limitations does not apply to the territory, and no matter how long government land may be held unquestioned, the territory is free to bring suit and take the title if the facts warrant it.

The land in question lies near Pearl City, and a portion of it is used for the cultivation of rice. Such land is generally valued at \$400 to \$500 an acre. It is understood that other portions are used for sugar cane making it equally valuable.

In going through some musty records a few days ago Assistant Surveyor Kananui uncovered the huge map, prepared by one A. Bishop, to show precisely the tract awarded to the Bishop Estate twenty-five years ago. The tract given the company was generally said to be the ill of Kumuulu. Kananui, on examining the old map, learned that this award referred only to the small lot, while the map described the entire tract, known at that time as the Ahupuaa of Waiu, and no mention has been found in the records that this latter tract was to be transferred to the company.

It is regarded as perhaps more a matter of luck for the territory that this map was not lost or destroyed in the intervening years, for it was not incorporated in the book or records, but stowed away with a miscellaneous lot of other ancient maps. The reason for this was that it was too large to be placed in the record book and instead, the description of the boundaries was written therein. Through carelessness or misunderstanding, it is believed, the employee who inserted the description gave the boundaries of the larger tract, naming it the ill of Kumuulu. The original map shows, says Thayer, that this ill is only a very small part of the tract described, and also shows just what the boundaries of the ill awarded the Bishop estate are.

The attorney general says the estate, in taking possession of the larger tract, undoubtedly acted in good faith, accepting the written description in the book of records without referring to the map to verify it.

## FIRST FIELD ARTILLERY IS AT RED HILL

(Continued from page one)

George S. Gibbs commanding, is rapidly getting its camp site in condition. Everybody is hustling and, in consequence, the plateau is taking on a park like appearance as regards roadways and bare places. Captain Gibbs has procured a quantity of explosives and his men are blasting out the huge boulders that have interfered with tent sites and drill ground. The company has an excellent ball team and the commanding officer has already announced that his wig-wag soldiers will take an active part in other athletics at Fort Shafter. A baseball diamond has been located and work begun to get it in shape. The place selected for the diamond is just south of the camp and from appearances an excellent field can be prepared, as the ground has naturally a much better surface than the parade ground of the post proper.

The Signal Company and Engineer Company have united in plans for a Post Exchange, preferring that scheme to uniting with the exchange of the main garrison. The institution has begun business in a building within the limits of the camp of the Engineers and is to make additions to the present building at once in order to accommodate the 20 or more men of the stockholding organization.

Captain Gibbs' company holds a world's record in the erection of portable wireless telegraph stations and establishing communication therefrom. This record was made at the Presidio of San Francisco in 1910. The time made was under 10 minutes and was taken from the arrival of the wagons containing the wireless apparatus until the first answering click from the adjacent station, and Captain Gibbs states that his men can still maintain the speed and teamwork that won them the record. It is probable that the field wireless outfit will be put in commission at once and communication established with Schofield Barracks and other posts on Oahu, and the work of the visual signalling detachments from this garrison supplemented by the scheme that is independent of sun and works equally well through "Kona" or fair weather.

The management of the post baseball league at Schofield Barracks has arranged to play their regular Saturday game at 1 o'clock that afternoon, instead of at 3 o'clock. This is in order to clear the way for the second game of the University Club-Army Officers' series, scheduled for Saturday, June 14, on the cavalry diamond at the post, and visitors to Schofield on that day will have an opportunity to see the Fourth Cavalry and Twenty-fifth Infantry teams in action.

Captain Al. Castle's stars will go out by motors while Major Smith's galaxy will travel by rail. The latter bunch being anxious to avoid nerve-racking and also, desirous of witnessing the fast soldier teams at play to pick up a few more additional points on inside baseball. Not that they expect to need them but just to have them in the repertory for future games.

Chief Musician Albert Jacobsen of the Second Infantry band has arranged the following excellent program for the concert preceding the regimental parade on Friday. The concert will begin at 3:45 o'clock: Introduction and Bridal Chorus, "Lohengrin"..... Wagner Overture—"Alessandro Stradella"..... Flotow Domino Gavotte..... Olshlegel Valse Lente, "Vision"..... Breille Selection—"The Pink Lady"..... Caryll Finale, "Swedish Wedding March"..... Soderman

Deputy Coroner Charles Rose will today... over the remains of Matsui... who was fatally injured... an explosion of giant powder at the Waialeale tunnel. In company with two Japanese workmen, the man was horribly maimed and though taken to the hospital he was found past medical aid.

PRICE IS ONLY \$2.75;  
AUTO REMAINS UNSOLD

\*\*\*\*\*  
+ In the infancy of the automo-  
+ bile game, when the price of cars  
+ made the multi-millionaires wince  
+ when purchasing and bored such  
+ a hole in the bank-roll that single-  
+ millionaires could not afford the  
+ luxury, it was predicted that  
+ eventually the price would be  
+ sufficiently low to allow the  
+ "middle class" to joy-ride. The  
+ same prediction was made during  
+ the infancy of the bicycle indus-  
+ try and it came true.  
+ The same with automobiles;  
+ the price has now become so ridic-  
+ ulously low that the hobo genus  
+ of the mainland might almost af-  
+ ford to ride in one. That is, pro-  
+ vided he was able to step into  
+ Honolulu and make the purchase.  
+ For the past week there has  
+ been a two-seated and rumble-  
+ seat offered for sale at one of  
+ Honolulu's principal corners at a  
+ price that is almost too little to  
+ pay for the repair of one punc-  
+ ture.  
+ "Take me home for \$2.75," or  
+ words to that effect, is the legend  
+ this car carries. In any event  
+ the figure is \$2.75 and apparent-  
+ ly there are no takers.

## IMMIGRANTS WILL B E DISPOSED OF SHORTLY

It is expected by the board of immigration officials that the last of the immigrants brought here from Spain a few days ago on the Ascot will be disposed of before the end of the week. There are now 300 on hand, and the number is lowering at about the rate of 100 a day.

So far the immigration officials are highly pleased with the result of the project, and declare that it has been in every way a success. Eleven hundred odd were landed, and a number have been left in quarantine, who, it is believed, will be turned over to the station soon.

The immigrants seem satisfied with their new conditions and the employment offered and the indications are that only a small percentage will leave for the mainland, say the officials at the station.

## EQUAL RIGHTS AMONG BIRDS.

Some interesting facts about Warblers Given by a Professor.

"The male pine warbler takes no part in the incubation of his young. He believes in equal right of women, takes no part in the nest building, watches his little wife gather the material and put it together, while he sits on a branch close by, pouring out his love in sweet, delicious notes. It's a case of everybody works but father," said Prof. William Brewster, discussing "Our More Common Warblers," in a recent lecture, according to the Milwaukee Journal.

"There is no more varied group than that of the warblers. They are divided into two large groups, old world and new world warblers. The old worlders are smaller and more modest in plumage. Anyone who can tell a warbler on the wing is a marvel. The differences of species are

## MANOLO TO LEARN HIS FATE ON SATURDAY

The fate of Celestino Manolo, the fourth member of the Filipino gang of confessed murderers, still hangs in the balance. Manolo pleaded guilty last week to murder in the second degree and took the witness stand for the prosecution last Monday morning, giving the direct testimony that resulted in the conviction of the other three. He was to receive his sentence this morning, but Judge Robinson deferred action until next Saturday morning.

Manolo will appear in court at that time with his companions, probably to receive an award of imprisonment for life, while the others will receive the death sentence.

The Chinese authorities have been requested to issue a new series of postage stamps to commemorate the opening of parliament.

With the national assembly not yet a month old, charges of bribery are circulating in Peking.

very difficult to notice when the bird is flying.

"The only way to know a warbler is to know him from the earliest through the various stages of his plumage, which change as fast as the Paris fashions. Of the wood warbler there are 159 varieties alone. Their territory covers the district between Argentina and Labrador. In North America there are fifty-five varieties. Here they reach their greatest numerical strength. They fly at night and often take a 500 mile trip between sun-down and sunrise. They are rapid on the wing and often get ahead of the weather. They are easily harmed by storm, their plumage is quickly saturated with water and they drown."

## BUT FEW MAKE BIDS FOR NEW HOMESTEADS

Although fifty homestead lots on Maui, containing five to ten acres each, are to be thrown open next Wednesday to settlers, there were only seven applications in Land Commissioner Joshua D. Tucker's hands when the drawing for places took place this morning. And of these, only two applicants are residents of Hana, Maui, the district in which the new homestead tract is to be opened. The others are residents of Honolulu.

The two residents of Hana get first choice in the selection of lots. They are Joseph K. Hookama and Alice L. Kahokuuluna, receiving first and second choice respectively. The others, in the order of their choice, are Edward W. Rosehill, Peter W. Kahokuuluna, Minnie P. Rosehill and James S. Achong.

The lots are in the Waihinu-Kakio district. Commissioner Tucker will go to Maui on the Claudine next Monday, to arrange for the selections to be made two days later.

There will be an arbor day at Fort Kamehameha, Pearl Harbor, June 14. Coconut trees are to be planted along the water's edge in front of what will be the officers' quarters. The officers are enthusiastic over the plans for the day, which will be under the supervision of Gerrit Wilder. Persons interested in the exercises are invited to be present.

POI WITH CAYENNE  
A SPANISH DISH

\*\*\*\*\*  
+ Wanted: A large supply of  
+ cayenne to put in poi.—Immigra-  
+ tion Station.  
+ Don Jose Enriquez and a few  
+ hundred of his immigrant fellow-  
+ travelers have found something  
+ which they do not like, and  
+ which is called poi. It is too  
+ much like indifferent paste, they  
+ say. It has not the kick of cay-  
+ enne in it. It is nothing like  
+ what they had at home.  
+ Don Jose Enriquez would have  
+ given up trying to master poi  
+ after the first attempt if he were  
+ not an unusual man, and con-  
+ scious of the truth that necessity  
+ is the mother of invention, and  
+ that poi is an undisputable prop-  
+ erty and foodstuff on the islands,  
+ as much as the slim tortilla is in  
+ the land of his birth.  
+ Enter a new food. It will be  
+ called Spanish poi and will have  
+ a good amount of the stuff which  
+ burneth but blazeth not in it.  
+ Don is confident that it will be  
+ a delightful dish, when plenty of  
+ cayenne is in it, and so the few  
+ hundred immigrants brought  
+ here the other day on the Ascot  
+ may have a new dish grander  
+ and hotter than any dish before.

## CHICAGO LEADS NEW YORK CITY

Marvin's Measurements.  
Weight.....45 pounds  
Height.....39 inches  
Neck.....13 inches  
Chest.....20 inches  
Biceps.....28 inches  
Forearms.....8 1/2 inches  
Waist.....25 inches  
Thigh.....19 inches  
Calf.....19 inches  
Wrist.....6 1/2 inches

Abe's Measurements.  
Weight.....14.1 pounds  
Head circumference.....16.3 inches  
Chest circumference.....17 inches  
Abdomen circumference.....18 inches  
Height.....26 inches

CHICAGO—New York City boasts the most marvelous baby in New York. Chicago boasts the most extraordinary baby in the United States.

Little Abraham Adelowitz, the son of a New York Romanian, weighs 14.1 pounds at 3 months and 15 days. Little—of rather big—Marvin Hurley Pilot, 11 months old, son of Jules Pilot, 112 Sunnyside avenue, is 45 pounds avoirdupois, 39 inches high.

The Chicago baby is the biggest and best baby so far discovered. Marvin only weighed 9 pounds at birth, but he has been going ahead ever since at a great rate.

All the doctors who have looked Marvin over are agreed that he is the leader of baby life in this city. He tops the bunch by pounds and inches. But in New York, they say they have a baby superior, on elapsed time. Little Abe Ledowitz is only 3 months old.

Of course, if the New York baby can make up the difference between his standing and the Chicago figure between now and the time he is 11 months old, there will be felicitations

telegraphed from Chicago. But the New York youngster will have to grow fast.

The Chicago baby is declared by Dr. Harry P. Hurley to be the most perfect baby in the United States. Doctor Hurley says:

"He is clean limbed! He is perfect in every organ! He is the beginning of all things!"

A jury was empaneled in Circuit Judge Cooper's court today to hear the evidence in the \$35,000 damages suit brought by George Ward against the Inter-Island Steam Navigation Company. Ward fell from a crane while employed by the company several months ago, receiving injuries from which he has not entirely recovered and which he claims will forever impair his usefulness as a skilled mechanic. He has been unable to do any work since the accident, which he alleges was due chiefly to a defective cable.

Wisdom consists chiefly in the judicious use of the blue pencil.

### Silverware In ESSEX Pattern

A selection of Silverware in the ESSEX pattern is especially adapted to fittingly mark a wedding, a birthday, a christening, an anniversary or to give satisfaction for personal possession.

The ESSEX design as interpreted by workmen trained through generations of silversmiths consistently sustains the fact that silverware is a purchase not for a day, nor a year, nor a lifetime—but for generations.
